Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 45,46 are rejected under 35 U.S.C. 102(e) as being anticipated by Lynn et al.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Lynn et al. discloses a needless luer access connector having a housing having a channel, a septum disposed therein, the septum having a proximal portion, a medial portion with a cross section less than the proximal portion and less than the channel, and a distal portion. (Figure 1)

Art Unit: 3763

A longitudinal slit extends along the length of the septum allowing for a male luer taper to be inserted into the slit and compressing the septum against the housing walls.

Allowable Subject Matter

Claims 1-7 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

None of the prior art of record discloses a needless luer access connector having a having a housing with a channel, the channel having a barb protruding from its sidewall; a septum disposed within the channel, the septum having proximal, medial, and distal portions with the medial segment having a cross section less than that of the channel and the exterior of the medial segment having a rib; and when a male luer is inserted into a slit extending the length of the septum, the rib of the septum engages the barb of the channel wall.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3763

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
